

2018 ROTO PAC SERIES AUTOMATED SIDE ARM

KEY FEATURES / KEY SPECS

COMPACTION: Mobile compactor of its kind to offer 23,000 lbs (10,433 kg) of torque in a screw-type auger for an impressive 1,000+ lbs. yd 3 (4,536 kg) compaction rate

40" LIQUID TIGHT HOPPER – Organic waste creates more liquid than any other collection category. ROTO PAC®'s liquid tight hopper allows you to fill up to 40" (1,016 mm) high.

PAYLOAD – The 27 cubic yd(24,7 m3) body on the ROTO PAC® can easily handle up to 13 tons (11,79 tons) of Organic or MSW payload.

HOPPER BODY DISPLACEMENT – At 7 cubic yd 3 (6,4 m3) per minute, ROTO PAC®'s hopper displacement ranks 20% higher than any other ASL system.

AUTOMATED SIDE LOADER – With a wheelbase 24" (610 mm) shorter than conventional side loaders, the ROTO PAC® is able to get you into, and out of, the tightest spaces with ease.

AUTOMATIC TAILGATE LATCHES – Operator convenience and safety has been integrated into all aspects of the ROTO PAC® design.

AUTOMATIC SIDE ARM – To aid in maneuverability, the ROTO PAC® arm has been engineered to extend an amazing 12 feet (3,7 m) while still maintaining up to 500 lbs (226,8 kg) of lift capacity.
8 Second cycle time

AUGER - ROTO PAC® auger-driven collection vehicle the first of its kind in the world, that auger can compact up to 7 cubic yd (6,4 m3) per minute and automatically sense, reverse and adjust PSI for a jam. Add to that the self-cleaning action created by the auger, and you have the quickest, toughest and most easily maintained vehicle on the market today.
